

RANGES LANDCARE
GROUP

Landscapers Who Love Their Work

Ranges Landcare Group offers exceptional landscaping for exceptional properties.

With experience in domestic, commercial & local government projects in the Macedon Ranges, we're true, local craftsmen. We handle your project from design through to completion - a balance of design & high quality tradesmanship.

“Ranges Landcare Group were exceptional from the very beginning. It’s comforting knowing that your garden is in the hands of someone that cares as much as you do - their attention to detail is excellent & their eye for design is superb.”

Our plants and grasses are sourced from our own local nursery in Kyneton, where we hand-grow and select the best plants for your job.

Our years of experience & passion for our work are unforgettable. Call us on **0417 862 418** to talk about your project.

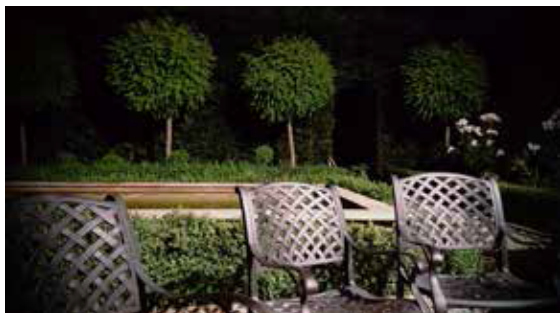

Landscape Design

We work with our clients to reimagine open spaces and transform them into gardens that can be loved & enjoyed by all who visit.

Landscape Consultancy

We love nothing more than lending our years of experience to someone who is venturing into their own landscaping experience. Our consultancy service is detailed, thorough & supportive.

Plant Supplies

Our nursery holds hundreds of the highest quality plants and materials for garden detailing, ready to be supplied for your own projects.

Environmental Rehab

Working with the local council, we cleared blackberry brambles from the area around the Memorial Cross on Mount Macedon, opening up the area and making it a more pleasant space for visitors.
